

Mathematics Instruction and Support

UNDERSTANDING MATHEMATICS IS THE KEY TO SUCCESS!

The number one reason that students give for having trouble in mathematics is that they do not understand it. Hence, they become frustrated and convinced that it is simply too difficult for them to master.

THE FACT IS: Mathematics must be clearly explained in a way which enables each individual student to fully understand each concept.

Our Founder, Ontario Certified Mathematics teacher, Don Reist, has been helping students in all grades (1-12) and levels excel in Mathematics since 1992.

With large classroom sizes through grades 4 to 12, a large curriculum in grades 9 through 12 and a short period of time per secondary semester, it is extremely difficult for educators to dedicate the time many students require.

Don provides:

- Personalized one-on-one instruction (45 minute and 60 minute sessions)
- A clear explanation of all concepts
- Strategies to break down and solve problems including word problems
- An explanation of the significance of the material being studied
- Study skills and test/exam taking skills
- Homework assistance
- Students with a new sense of self-confidence

WE HELP STUDENTS ALONG THE PATHWAY TO MASTERING MATHEMATICS
